

Dr. Francisco Hernandez Guevara

Specialties

Surgery, Orthopedic, Spine

Dr. Francisco Hernandez Guevara has enjoyed serving patients in the Matamoros area for over 18 years. His background includes medical school at UANL in Monterrey, orthopedic residency at Hospital de Especialidades T1 IMSS in Merida, Yucatan and additional spine surgery training at Hospital HOMS in Mexico City. Dr. Hernandez Guevara is known for his very straightforward and honest approach in dealing with patients/family and operates only on crystal-clear indications with proven techniques. He has a conservative approach to surgery and maintains an “old school” bedside manner including making some house calls on occasion. Dr. Hernandez Guevara treats complex problems involving previous hip replacements and accepts referrals for post-operative spinal problems. Half of his practice is focused on patients with spinal problems and the remaining fifty percent are patients requiring total hip and knee replacements. Dr. Hernandez Guevara utilizes BIOMED ceramic hip replacement devices and BIOMED metal/high density polyethylene knee replacements. He is one of a handful of orthopedic surgeons in the state trained in the use of Braun Medical’s ORTHOPILOT, a state-of-the-art minimally invasive knee replacement navigation system. Dr. Hernandez Guevara is a member of AMOT, AMCICO (Mexican orthopedic associations) and International member of the American Academy of Orthopedic Surgeons.
